

ComEd's Low Income Discount Program

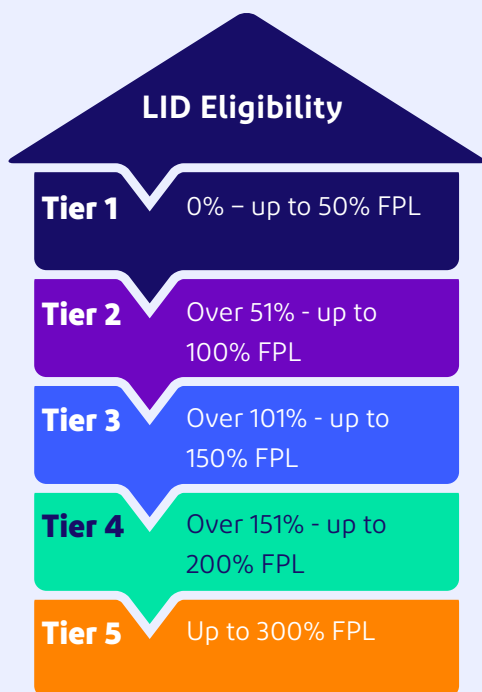

ComEd's newest affordability initiative, the **Low Income Discount (LID)** program, launched Jan. 1, 2026, to provide income-based percentage discounts on monthly electric bills. Approved by the Illinois Commerce Commission in 2024, LID is designed to help ComEd customers keep their electricity costs within **3–6% of household income** to help income-eligible customers manage their energy bills.

LID comes at a critical time as nationwide capacity constraints—due to surging demand for electricity and limited expanding supply—continue to drive up energy costs for customers. With more than one-third of ComEd customers classified as low income, LID reinforces our commitment to ensuring that our leading reliable service remains affordable for all. Learn more about how the program will roll out in 2026.

Eligibility

Discounts under ComEd's LID will be divided into five tiers to give the greatest savings to those most in need. Actual bill savings per customer are dependent on average energy use within a residential service delivery class and will vary by income tier.

The LID discount applies across five tiers:

Household Income as a Percentage of Federal Poverty Level (FPL)

How to qualify

Those approved for LIHEAP since October 2024 are **automatically enrolled** in one of the first four tiers of LID. For customers who haven't enrolled in LIHEAP, ComEd encourages them to visit their LAA to begin the process for qualifying for LIHEAP now, so that they can qualify to receive LID in 2026.

Those who do not meet the eligibility requirements for LIHEAP, but have incomes between **201% and 300% of the Federal Poverty Level**, can qualify to receive LID. These customers should visit their local LIHEAP administering agency, or enroll through ComEd's Smart Assistance Manager tool at **ComEd.com/SAM**.

Upon qualifying, customers become eligible to receive the LID for up to 24 months, based on their enrollment date, without the need to reapply.

Financial Assistance from ComEd

LID builds on a long-standing menu of options aimed at empowering customers to save on energy costs and reduce usage, while providing assistance when they fall behind on payments. In 2025 alone, these programs have helped connect nearly 190,000 customers to more than \$94 million in financial assistance.
